Service Description

American Cyber's Cybersecurity Maturity Model Certification (CMMC) 2.0 Readiness Assessment provides organizations with an evaluation of their security posture against industry frameworks and best practices.

This service delivers a comprehensive review of the organization's current cybersecurity practices aligned with CMMC.

It includes interviews with key stakeholders, an analysis of existing policies, procedures, risk management processes, and technical controls.

Based on the findings of the gap assessment, the organization will receive detailed reports on potential areas of risk and recommendations for addressing those risks to achieve full compliance.

Key Benefits

- **CMMC Compliance:** Ensure your organization meets the necessary requirements for CMMC certification.

- **Identify Gaps:** Pinpoint areas where your cybersecurity practices need improvement.

- **Improve Security:** Strengthen your overall security posture by addressing identified weaknesses.

- **Boost Confidence:** Increase stakeholder confidence in your cybersecurity measures.

- **Reduce Risk:** Minimize the risk of cyber threats and data breaches by proactively addressing vulnerabilities.

AMERICAN CYBER

A Primer to CMMC

CMMC is an effort to address the security gaps that exist in the Defense Industrial Base (DIB). It's a compliance program designed to protect the integrity of our military by protecting information that could be used against our country during a conflict.

Did you know that the F-35 Lightning II was developed with contributions from over 1,900 suppliers?

The F-35 Lightning 2 is currently the most advanced fighter jet ever built. Many of the companies within the Defense Industrial Base (DIB) produce widgets that go into this advanced aircraft. These businesses may possess sensitive information on the design specifications and components of this military aircraft that make them an ideal target for cyber attacks.

AMERICAN CYBER

Our Process

American Cyber follows a staged approach that includes, but is not limited to, the following steps:

- **Information Collection**
- **Stakeholder Interviews**
- **NIST Gap Analysis**
- **Risk Prioritization**
- **Guided Remediation**
- **Remediation Action (Optional)**
- **Service Reporting**

What's Included

NIST Gap Analysis Report
CMMC Risk and Remediation Report
Plan of Action & Milestones (POA&M)
System Security Plan (SSP)
CMMC Executive Presentation
Comprehensive Remediation Guidance
[Optional] American Cyber Professional Services Security Engineering and Architecture Services (SKU: PRO-SEAS) at $200 per Hour.

AMERICAN CYBER

A FRICTIONLESS SECURITY JOURNEY

Access a top ranked team of security professionals that deliver a frictionless security journey to support your business so that you can focus on what you do best.

Benefit from our unique approach that we call **Security Program Orchestration (SPO)** that is producing returns of up to 10x for every dollar invested in your security program.

AMERICAN CYBER

American Cyber is on a mission to **build** resilient and compliant **cybersecurity programs** for small businesses.
